

ORGANIZED BY:

ICPS7 2025

7th International Conference of PROTECTIVE STRUCTURES

12th - 15th May 2025

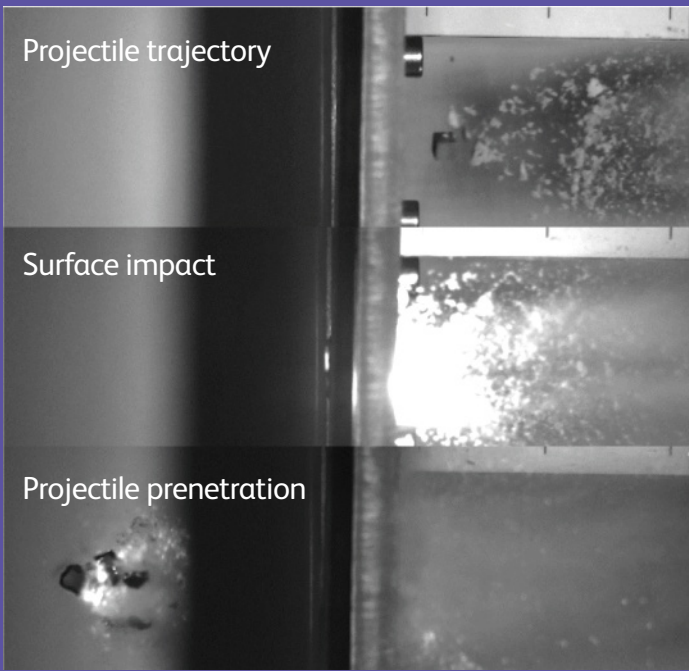

Saadiyat Island, Abu Dhabi, United Arab Emirates

Important dates:

Key topics:

- Response of structures and structural elements to explosion and impact loads
- Blast and impact-resistant design of structures
- Techniques for mitigating blast load and penetration effects
- Strengthening and retrofitting techniques
- Projectile penetration and perforation mechanics
- Collateral damage estimation
- Numerical simulation and modelling
- Probabilistic and uncertainty modelling
- Experimental techniques
- Material behavior at high strain rates
- Vehicle impact with civil structures
- Protection of industrial structures
- Impact induced by tsunamis, extreme wind, and other natural disasters
- Innovative materials for protection applications
- Bridge and tunnel protection
- Post-event evaluation and performance assessment
- Structural collapse mitigation strategies
- Safety, reliability and cost-effectiveness of structural design and strengthening

Sponsorship & Exhibition Opportunities

With multiple sponsorship packages and exhibit booths available, you are sure to find one that fits your needs.

Reach your target audience!
